

2018 Chassis Benz Used Concrete Pump Truck 49M SANY Second Hand Concrete Trucks

Our Product Introduction

for more products please visit us on hnhzmachinery.com

Basic Information

- Place of Origin: CHINA
- Brand Name: SANY
- Model Number: Sany Used Concrete Pump 49M
- Minimum Order Quantity: 1 UNIT
- Price: Negotiatel
- Packaging Details: N/A
- Delivery Time: 25 Days
- Payment Terms: L/C, T/T
- Supply Ability: 30/unit/month

Product Specification

- Max. Delivery Height: 36.1m
- Manufacturer: SANY
- Color: Yellow/Red/white
- Hydraulic System: Open
- Dimension: 8.5m*2.2m*3.5m
- Weight: 36.2t
- Year: 2020
- Chassis Brand: Benz
- Highlight: **Used Concrete Pump Truck 900m3/h,
Used Concrete Pump Truck 49M SANY,
SANY 2018 Second Hand Concrete Trucks**

Product Description

2018 Chassis Benz Used Concrete Pump Truck 49M

Product Description:

Used Concrete Pump Trucks are widely used in construction sites to transport and pour concrete over long distances. The Max. Delivery Distance of these used concrete pump trucks is up to 150m, making them an ideal choice for construction projects requiring concrete delivery over long distances. With dimensions of 8.5m*2.2m*3.5m, these used concrete pump trucks can reach a maximum delivery height of 36.1m, making them suitable for projects with higher delivery needs. Available in a variety of colors, including yellow, red, and white, these used concrete pump trucks feature two pump cylinders for increased performance. Used Concrete Pump Trucks are ideal for large construction projects, offering superior performance and convenience with used concrete pump trucks for sale.

Features:

Efficient Concrete Delivery

Used concrete pump trucks are designed to efficiently deliver concrete to construction sites, providing faster and more precise placement of concrete compared to traditional methods.

Extended Reach

Equipped with long booms or arms, these trucks are able to reach hard-to-reach locations such as high-rise buildings or remote construction sites, allowing for concrete placement in places otherwise inaccessible.

Versatility

Used concrete pump trucks are versatile, as they can be used for a broad range of applications including residential, commercial, and infrastructure projects.

Time and Labor Savings

A concrete pump truck significantly reduces the time and labor required for concrete placement, ultimately resulting in major savings for construction projects.

Improved Concrete Quality

Concrete pump trucks ensure consistent flow and uniform distribution of concrete, leading to improved quality and greater strength of the completed concrete structures.

Increased Productivity

As concrete pump trucks enable continuous and efficient concrete pour, overall productivity on construction sites is improved.

Reduced Site Congestion

Through minimizing the need for multiple concrete mixers or wheelbarrows, concrete pump trucks reduce congestion and improve safety on construction sites.

Enhanced Safety

Concrete pump trucks decrease the manual handling of heavy concrete loads, making work on construction sites much safer.

Easy Maneuverability

These trucks are designed for easy maneuvering on the construction site, allowing for flexible placement of concrete that meets project requirements.

Cost-Effective Solution

Investing in a used concrete pump truck is a cost-effective option for construction companies, as it provides the benefits of a brand-new truck at a fraction of the cost.

Technical Parameters:

Attributes	Details
Engine Power	200kw
Max. Delivery Height	36.1m
Dimension	8.5m*2.2m*3.5m
Year	2020
Pump Cylinder	2
Capacity	900m ³ /h
Max. Pressure	12Mpa
Weight	23t

Material	Steel
Manufacturer	SANY

Applications:

High-rise construction:

Concrete pump trucks are well-suited for tall building projects, where they can deliver large amounts of concrete to higher floors with great efficiency, something that wouldn't be possible via tower cranes or manual labor.

Infrastructure projects:

Used pumps are widely used for transportation infrastructure projects, like bridges, overpasses, dams and roads, as they make the process of pouring large quantities of concrete much simpler and more economical.

Precast/tilt-up construction:

Concrete pumps offer a great solution for precast/tilt-up construction projects due to their continuous and economical pour capabilities, making them a great choice for high-productivity environments.

Industrial/commercial construction:

Large warehouses, factories and parking structures are perfect candidates for using concrete pump trucks given their ability to deliver large amounts of concrete to the job-site quickly and effectively for rapid floor and foundation works.

Tunneling projects:

Tunnels, underground utility trenches and subway stations construction require concrete pump vehicles given the enclosed environment of the construction site that makes any other form of concrete delivery impractical.

Underground parking:

The extended hose and boom of concrete pumps are perfect for dispensing concrete on structural floors and ramps inside underground parking facilities as they are able to reach even the most far away parts of the job-site.

Swimming pools/flatwork:

Concrete pumps provide the perfect solution for constructing dense concrete walls and floors on backyard and community pools, as they make it much simpler to place the concrete in a residential setting.

Remote/rural jobsites:

Used concrete pumps are extremely useful for jobsites that require remote or rural delivery, as they are often the only way to transport concrete to sites that are otherwise inaccessible for transit mixers.

Support and Services:

Technical Support & Service for Used Concrete Pump Truck

We provide comprehensive technical support and service for our used concrete pump trucks. Our support team is available to answer questions, provide solutions, and help resolve any issues that may arise.

We offer a comprehensive inspection of the truck before delivery, to ensure that the truck is in good working condition.

We provide technical advice and assistance in the selection of the most suitable truck for the customer's needs.

We provide on-site installation and training on the operation of the truck.

We offer a comprehensive after-sales service, providing spare parts and repairs.

We provide technical support and advice on maintenance and repair of the truck.

We strive to provide the highest quality service and support to our customers, ensuring that they can make the most of their used concrete pump truck.

Packing and Shipping:

Packaging and Shipping

Used Concrete Pump Trucks are packaged and shipped in accordance with the manufacturer's specifications. All products are carefully inspected and wrapped for secure transport.

The trucks are then placed on pallets or in crates and loaded onto the appropriate shipping vessel. The truck's destination and delivery date are coordinated with the carrier to ensure safe and timely arrival.
