Applications:

The SANY SYM5540THBF has a 7-section boom that provides a maximum vertical reach of 64.1meters and a horizontal reach of 58.9 meters. This makes it suitable for a wide range of construction projects, including high-rise buildings, bridges, and tunnels.

One of the main advantages of the SYM5540THBF truck-mounted concrete pump is its mobility. It can easily navigate through narrow streets and tight corners, making it ideal for urban construction sites. It can also be used in remote locations where access is limited, such as mining sites and oil rigs.

The SYM5540THBF concrete pump truck is suitable for various applications, including pouring concrete for foundations, walls, and columns. It can also be used for concrete pumping in precast factories, tunnel construction, and for repairing damaged concrete structures.

Construction companies that require high-quality and efficient concrete pumping services can benefit from using the SYM5540THBF. Its 7-section boom allows it to reach almost any height or distance, making it a valuable asset for any construction project.

In summary, the SYM5540THBF is a reliable and efficient truck-mounted concrete pump that can be used in various construction scenarios.
