Applications:

The SANY SYM5449THB560C-8A has a 6-section boom that provides a maximum vertical reach of 55.1 meters and a horizontal reach of 4.68 meters. This makes it suitable for a wide range of construction projects, including high-rise buildings, bridges, and tunnels.

One of the main advantages of the SYM5449THB560C-8A truck-mounted concrete pump is its mobility. It can easily navigate through narrow streets and tight corners, making it ideal for urban construction sites. It can also be used in remote locations where access is limited, such as mining sites and oil rigs.

The SYM5449THB560C-8A concrete pump truck is suitable for various applications, including pouring concrete for foundations, walls, and columns. It can also be used for concrete pumping in precast factories, tunnel construction, and for repairing damaged concrete structures.

Construction companies that require high-quality and efficient concrete pumping services can benefit from using the SYM5449THB560C-8A. Its 6-section boom allows it to reach almost any height or distance, making it a valuable asset for any construction project.

In summary, the SYM5449THB560C-8A is a reliable and efficient truck-mounted concrete pump that can be used in various construction scenarios.
